WORK EXPERIENCE

Consolidated Edison *June 2016 - Present*
Engineering Aide

- Programmed over 30 new SCADA (Supervisory, Control, and Data Acquisition) GUIs that monitor the electrical distribution system in NYC with AutoCAD and SQL queries
- Added a crucial estimated completion time feature to multi-stope feeder repairs on internal application; impacted four regional control centers across the company
- Built a system of Excel files across Sharepoint to track on-field staffing during emergency storms; automated a summary sheet for the data with VBA

SELECTED PROJECTS

Habit Tracker Heatmap *June 2018 - Present*

- Implementing the “don’t break the chain” method of habit-keeping to a web application that displays a heatmap of completed habits in a calendar
- Using D3js to generate graphics and Go to power the back-end that loads HTML pages

To-do List Web App *February 2018 - March 2018*

- Worked in an agile development student team to develop a to-do list web application
- Used Flask for the back-end, a MySQL database, and jQuery for the front-end

Thermoelectric Battery *January 2018 - May 2018*

- Constructed an Arduino-controlled, thermal-powered portable battery
- Generated 9 volts from a coffee cup to charge a cellphone

International Young Physicists’ Tournament *September 2016 - May 2017*

- Programmed an Arduino to collect water droplet oscillation frequency to investigate their harmonic properties when exposed to temperatures exceeding their boiling points
- Discovered an initial increase and eventual decrease in frequency with respect to temperature

AWARDS
